BRIDE-ELECT HONORED BY SHOWER

Pythian Sisters Gather and Presents are Showered on Miss Minnie Chalmers

A most interesting and enjoyable shower was held in the K. of P. hall on Monday, Feb. 18, in honor of Miss Minnie Chalmers, whose marriage to Mr. James Wheatley of Banff will take place during the month of March.

A great many of her friends and Pythian Sisters attended, and enjoyed a game of whist, the prize winners being: Ladies, first Miss M. Bell; consolation, Mrs. Roushead; gents, first Mr. H. Davies; consolation, Mr. A. Hughes. After whist, supper was served; flowers decked the tables, which were presided over by Mrs. G. Reid, Mrs. J. Richards, Mrs. Gillis and Mrs. Garner. Dancing was indulged in until 1 a.m., the music being provided by Mrs. Salt's orchestra.

Miss Chalmers was the recipient of the following useful presents: Mrs. Chalmers, bedding; Mr. and Mrs. G. Reid, silk, flower vase; Mr. and Mrs. J. Richards, electric iron; Mr. and Mrs. Garner, flower vase; Mr. and Mrs. Gillis, stainless knives; Miss May Bell, candle sticks; Mr. and Mrs. W. Wilson, coffee spoons; Mr. and Mrs. H. Hill, stainless knives; Mr. and Mrs. R. Holmes, cream jug and sugar basin; Mr. and Mrs. C. Rodgers, casserole; Peggy Fairfield, silver stand; Mr. and Mrs. J. Derbyshire, pillow cases; Mr. and Mrs. R. Morris, silver stand; Mrs. Wesworth, towels; Mr. and Mrs. A. Knowles, set of dishes; Mrs. Fairfield, towels; Mr. L. Brown, cover and pillow cases; Mr. and Mrs. H. Boulton, blankets; Mr. and Mrs. Carey, dishes; Mr. A. Wilson, silver cream jug and sugar bowl; Mr. and Mrs. H. Snowden, silver bread tray; Mr. and Mrs. Nash, towels; Mr. and Mrs. J. Muir, casserole; Mr. and Mrs. W. Fraser, table centre; Mr. and Mrs. R. Lonsbury, towels; Mrs. Gillespie and Peggy, luncheon set; Mrs. M. Hughes, pillow cases; Mr. W. Gates, pillow cases; F. Patterson, pillow cases; Mrs. Cornett, towels; Mary and Nettie Gillespie, towels; Mrs. W. Bell, cold meat tray; Mrs. Vincent, pillow cases; Mr. and Mrs. J. Hart, berry spoon; Mrs. Roushead, pillow cases; Mrs. Nelson, berry set; Mrs. Duffield, fruit dishes; Mrs. L. Richards, fruit dish and spoon; "Impie" Lilya, silver pepper and salt; Mr. and Mrs. Stanfield, butter dish and knife; Mr. and Mrs. Rushton, luncheon set; Mrs. Hancock, fruit bowl; J. Lonsbury, cup and saucer; Mr. Wilson, pyrex plate; Mrs. Glendenning, pillow cases; J. Ewing, tea spoons; Mr. and Mrs. Eph. Hill, tea spoons; Mrs. J. Ramsey, casserole; Mrs. A. Rutter, glass basket; Mr. Dutil, clock; N. Royle, pillow cases; Mr. Bell Jr., dish and servers; Mr. and Mrs. R. Brown, tea pot; Mrs. McCulloch, tray; Mrs. J. Denholm Sr., cruet; Mr. and Mrs. Smith, towels; Mr. and Mrs. W. Cousins, sugar bowl; Mr. and Mrs. J. Rodgers, towels; "Pat", tea spoons; A Friend, towels; Dulcie Richards, forks; W. and J. Reid, coffee percolator; Mrs. E. J. Phillips, berry set; Mr. and Mrs. Mansell, glasses and water jug; Mr. and Mrs. McCarty, tea spoons; Mary Garner, a doll; "Bud, Buck and Herbert", baby soother and can of milk.

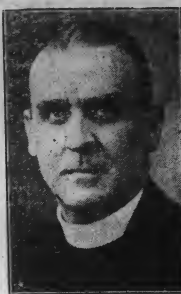

Church Bell for St. Alban's

There arrived this week from Troy, N. Y., a fine bell which will be hung in the new belfry of St. Alban's, and on Easter Sunday it will be used for the first time.

The bell is a memorial gift to the church from Mr. Geo. H. Snood, in memory of his wife, who died last August, and the cost of the belfry is being defrayed by the Junior W. A.

Albert Knowles received a painful injury last week, while assisting in loading logs near Crow's Nest Mountain. With his son Jeff he was helping to place logs on their truck, when he slipped, and just at the time Jeff hopped his axe down, catching his father's fourth finger on the left hand, which later had to be amputated. He has been in hospital since.

BISHOP SHERMAN HERE NEXT SUNDAY

On Sunday next the Rt. Rev. L. Ralph Sherman, D.D., Lord Bishop of Calgary, will be the celebrant at Holy Communion, at 9 a.m., and at evensong at 7 p.m., he will preach. He will be at Blaimore at 11 a.m. for the service there.

It is of special interest to note that Sunday (St. Matthias' Day) is the second anniversary of the consecration of Bishop Sherman. All church members, together with their friends, should make a special effort to attend the services on this and is on view in the window of date. The bishop's advent into this diocese has re-awakened spiritual interest among all church people, and also has created interest in other dioceses by the vigorous manner in which he has put this diocese on a sound footing. His addresses will be well worth hearing, and the rector, Rev. A. D. Currie, urges all parishioners to attend.

School Trustees Meeting

A regular meeting of the school trustees was held on Monday evening, when committees were appointed as follows: Management—T. Johnson, J. M. Allan, J. Glendenning; property, H. Snowden. T. Johnson, chairman of the board, time, but were unable to secure a verbatim report on his visit as delegate to the trustees convention held in Lethbridge. Some handicapped in their struggle discussion took place relative to the school management, the atmosphere becoming somewhat breezy hence of the league games this morning, according to reports, the new trustees who were sworn in later being the opportunity to develop its own an interested audience.

Though nothing official has been given out by the board, it is understood that a definite ruling on matters in dispute has been made by the board, concerning the duties of the caretaker of central school.

Oratorical Contest at Blaimore

The district oratorical contest, including the schools of Coleman and Pincher, will take place at Blaimore on Friday, March 1. The contestants are Miss Megar Jones, Coleman, and Miss Lillian Drew, Pincher Creek. The winner of this contest will compete in the finals for Southern Alberta schools which will be held in Calgary.

Miss Jones' subject will be "Canada Among the Nations."

Palace Theatre Program

Friday and Saturday—Emil Jannings in "Sins of the Fathers."

Monday and Tuesday—"The Midnight Taxi."

Wednesday—"Romance of the Underworld."

Thursday—Karl Dane and Geo. K. Arthur in "Brotherly Love."

Coming, March 4—John Gilbert and Renee Adoree in "The Cossack."

Hubert W. Clark, of the Bank of Commerce staff, Gleichen, is spending three weeks holidays here with his parents, Mr. and Mrs. Harry W. Clark.

PASS TOWNS PLAYING CUP SERIES

Old Trophy Donated by Former Lethbridge Business Man is Sought for Prize Among Pass Towns

Two games were played during the week in the Wright Cup series, between Bellevue and Coleman. The first was at Bellevue last Friday night and despite ten minutes overtime being played, the score was 2-2. The referee called for both teams to play extra overtime, but Coleman players according to the report of the game from the press correspondent at Bellevue, refused to play any more, so the locals centered the puck and scored, making it 3-2 for Bellevue.

The return game was played here on Monday evening when the result was 4-3 in favor of Coleman. Gate and Stevalak, defence players, were not playing in this game, their positions being taken by Gary and Sadiluh, both of whom played a good game.

The cup which this series is held on Monday evening when the result was 4-3 in favor of Coleman. Gate and Stevalak, defence players, were not playing in this game, their positions being taken by Gary and Sadiluh, both of whom played a good game.

Pincher Creek played here last Friday night, but the teams were so unevenly matched that the game held very little interest for the spectators. The visiting team are a good sporty team and despite the odds against them played the full Johnson, chairman of the board, time, but were unable to secure a verbatim report on his visit as delegate to the trustees convention held in Lethbridge. Some handicapped in their struggle discussion took place relative to the school management, the atmosphere becoming somewhat breezy hence of the league games this morning, according to reports, the new trustees who were sworn in later being the opportunity to develop its own an interested audience.

Following the assignment of Miller Thano's of the Palm Cafe, the stock was purchased by Mr. Frank Celli, owner of the building in which the business is carried on, and he will re-open the cafe on Saturday. Mr. Celli sold this business in 1921, and has since operated a large fruit farm at Creston, B. C. During the time he operated the business here he gave first-class service, and it is his intention to supply not only the best in confectionery and other goods, but a very fine stock of fruits and vegetables will be sold direct from his farm at Creston.

Palm Cafe Re-Opening

The death occurred on Thursday last at Great Falls, Montana, of Isabella Platt, wife of George H. Platt, secretary of the Great Falls Ironworks and secretary-treasurer of the Collins Plumbing and Heating Co. She was 41 years of age, and besides her husband is survived by three children.

Mrs. Platt was the daughter of Mrs. Dora Falloon of Coleman, who arrived in Great Falls only a short time after her daughter passed away. Mrs. Harry Short of Meropol is a sister, and Charles Stevenson of Coleman is a nephew.

Hot Dogs—Oh Boy!

To see them disappear in record time, you should see a bunch of hungry boys after a hockey match. Blaimore and Coleman midget teams after the game on Tuesday night went to the Catholic club room, and what they didn't do to the feast of hot dogs, buns, oranges and other articles of refreshment isn't worth telling. Principal McPherson of the Blaimore team told what a fine bunch of boys he had; Mickey Brennan shone equally as good in extolling the merits of Coleman boys, and Vichy Cologrosso, who refereed the game, handed out a little advice gratis. Though Blaimore beat Coleman on the ice, the honors were even when it came to the "eat."

COWLEY SUFFERS DISASTROUS FIRE

Only One Building Left in Business Section—Hotel Kitchen Was Starting Place

Fire broke out at 2 a.m. on Monday at Cowley in the hotel, and quickly spread to adjoining buildings, the following report appearing in the Lethbridge Herald yesterday concerning it:

Fire broke out in the kitchen of the Cowley Hotel at 4:15 this morning. Fanned by a terrific west wind, it soon gained headway and completely destroyed the hotel, Masonic hall building, Chinese cafe and Cowley Motors. Other buildings were in great danger, but with the aid of the chemical engine and the superhuman efforts of the city firemen it was confined to the above buildings. Several cases were in the garage but were run out by hand to safety. The water from melting snow drifts gave the bucket brigade sufficient water to do effective work. All guests and employees of the hotel escaped in their night attire. Some insurance was carried by the cafe and hotel and Masonic building, but the Motors had none. Mrs. Christie's store is the only remaining building in the centre of the business section.

Difficulties in Water Service

The East towns from Bellevue west to Kimberley have felt the severity of the weather of the past few weeks in no uncertain manner. Owing to the gravity of nature of the soil the frost has penetrated below the level of the water pipe lines, and despite the continued efforts to keep them thawed out by the use of electric thawing machines, house connections very soon freeze again, while in some cases the extreme ends of main pipes have frozen solid. This condition will continue till the spring thaw comes and will entail heavy expense in maintaining crews to work steadily in their efforts to maintain service to the people.

Blaimore won from Nanton on Monday evening at Blaimore by 8-3, and the return game is to be played this evening at Nanton. It is a foregone conclusion that Blaimore will win, as visitors from Coleman considered that Nanton did not show up good in Monday's game.

Bellevue and Hillcrest are scheduled in play-off games, the winner of home and home games to play Coleman for the championship of the Pass in B intermediate series.

Mrs. Currie and a number of members of the Junior W. A. of St. Alban's church are attending a conference in Calgary.

A musical recital, in which Mrs. Salt's music class will take part, will be held in the K. of P. hall on Monday evening.

BLAIMORE JUNIORS WON

Blaimore and Coleman midget played here on Tuesday night, the visitors scoring a victory by 4-1. The line-up was as follows: Blaimore, Dicken; Farmer and Patterson; McPhail, Fraser, Simville, McPhail, Coleman, DeCocco; Clarke, Johnson; Patterson, Fraser, Kwasney, Hoyle, Andros. Coals scored—Coleman, Johnson; Blaimore, Patterson and McPhail. Mickey Brennan is coaching the Coleman boys and Principal McPherson the Blaimore boys, and they have some promising material among these young players.

SNAPPY MUSIC INSTILLS SPEEDY WAITER SERVICE

If Emil Jannings were a restaurant owner instead of a motion picture star, he would see to it that the orchestra in his place played snappy music, for he has learned that lively tunes speed up service. The lesson that Jannings is willing to pass on to interested cafe proprietors gratified him to him through personal experience.

In his current starring picture, "Sins of the Fathers," showing at the Palace theatre, Jannings takes the part of a German-American who starts his road to success as a waiter. A stringed orchestra was providing music for the cafe scenes and as usual was playing while the star worked before the camera.

The orchestra leader seemed to be partial to waltzes and one dreamy selection followed another one. For a time Jannings worked and said nothing. Finally he turned to Director Ludwig Berger:

"Tell the orchestra to play something lively," he said. "How can I ever be a waiter and get the patrons served to slow music like that?"

Prize winners at the K. of P. whist drive on Saturday were Mrs. W. J. White, Mrs. Wm. Cousins, H. Harris and Geo. Baxter.

According to word received from Trail, B.C., Jollett Houbregs and Dave Kemp, two former Blaimore boys, are going wrong in hockey. The Trail team is now at the top of the West Kootenay league with upwards of fourteen points, followed by Rossland with eight and Nelson two. So far this season, Dave Kemp in the net has had but ten goals scored against him. Trail's lineup is as follows: Kemp goal; Reddick and Houbregs defense; Kendall, Lyons, Brennan, Gustafson, Wheatley and Mackie.—Blaimore Enterprise.

ANOTHER FIRE ON BLAIMORE ROAD

Through Non-Co Operation of Insurance Companies This District is Not Served by the Brigade

The home of Walter Demolika was totally destroyed on Tuesday morning at 1:45, fire breaking out presumably from overheated stove-pipes.

This is the second fire within ten days in that vicinity. The alarm was given at the fire hall here, but as the property is outside of the town limits, the brigade did not turn out.

The brigade has on various occasions responded to calls outside of the town limits, but owing to disputes having arisen over payment by the insurance companies for the work of the brigade, and the non-fulfillment of promises made by certain individuals, the council some time last year decided that the brigade would not attend fires occurring in those portions of the town which did not contribute towards the maintenance of the brigade.

Apparently the insurance companies prefer to allow these houses which are insured to be destroyed rather than pay their share of the upkeep of the town fire brigade. It is mighty hard on those people who pay for insurance.

Town Council Committees

Finance, Pattinson, Moore, Snowden, Works and Property, Nelson, Patterson, Snowden, Water and Light, Moore, Patterson, Russell, License and Police, Rushton, Snowden, Nelson, Relief, Snodgrass, Smith, Rushton, Ryland, Smith, Patterson, Moore, Patterson, Moore, Smith, Buildings, Moore, Patterson, Snowden.

It is expected that Mr. and Mrs. W. S. Purvis will leave here in the spring to reside in San Francisco, after living in Coleman for ten years.

The Biggest Name in Pictures
EMIL JANNINGS in
"Sins of the Fathers"

"Sins of the Fathers" is first and foremost a Jannings picture.

Give this star most any kind of a story and he turns out a real picture. But give him a "Sins of the Fathers" and he pulls another "Patriot." See Jannings. See Ruth Chatterton, the famous stage star, who is Jannings' leading woman. Jannings really believes this to be one of his finest characterizations, even remembering the Czar in "The Patriot." See the powerful, human theme of the play—of paternal love and sacrifice.

A story that is "perfect Jannings." And "THE PATRIOT" showed you just how perfect that can be.

Palace Theatre
FRIDAY and SATURDAY

ANGLO-AMERICAN FRIENDSHIP TO BE SAFEGUARDED

London, Eng.—It was learned in well-informed circles that proposals for a new approach to settlement of the disarmament problem may be made by the British government to the United States in the near future.

There were definite indications of a feeling in British government circles that an entire new system of approaching the disarmament question was needed. It was understood that this attitude would be applied to all armament problems that are not already regulated by treaties.

It was stated that a new method of solution would be sought in an effort to safeguard Anglo-American friendship and ally suspicion and misunderstanding in both the United States and Britain.

Past attempts to arrive with mathematical precision at a parity of naval strength, matching ship for ship, and ton for ton, is now viewed by an increasing number of British officials as having been the chief obstacle to an armament agreement between Britain and the United States. They have been able to see little indication of the possibility of agreement on an equality basis. Therefore they are now considering what other method can be used for the solution of the problem and they seek specially one which would be based largely on mutual confidence and goodwill.

The influential Britons who have been trying to shape this government's United States policy so that it would tend toward conciliation in all difficulties, have been shifted away from any action that might involve disputes on technical questions. They have feared that such questions would arouse public misunderstanding on both sides of the Atlantic.

This attitude applies, for instance, to the United States Senate resolution proposing a conference on maritime law. The Gulf separating the traditional British and United States views on this subject is the first in some high quarters to be believed that such a conference would be unable to reach an agreement. Therefore they have considered that it would be undesirable, because it might arouse further international misunderstandings.

Amend Post Office Act

Bill Has Been Given First Reading in House of Commons

Ottawa, Ont.—A bill amending the post office act was given first reading in the House of Commons. The measure concerns the ownership of newspapers. It provides that a sworn statement must be furnished to the post office semi-annually giving the names and addresses of editors, owners and stockholders and other particulars. Religious publications are not affected and the names of small stockholders may be omitted in all returns, according to a clause in the bill. It is proposed that failure to comply with these provisions may incur a penalty of denying admission of dilatory newspapers to the mails. A further clause provides that paid reading matter must be marked as advertisements. Neglect to comply with this provision under the bill would incur a fine of not less than fifty dollars and not more than five hundred dollars on conviction. The measure was introduced by T. L. Church, Conservative, Toronto northwest.

Dispute Was Settled

Canadian Workers Re-Installed in Old Positions in Toronto

Ottawa.—In the House of Commons H. B. Adedeh, Labor, East Calgary, asked the Minister of Labor whether he had any information to give the members with reference to German immigrants brought into this country to replace Canadian workers in Toronto.

Hon. Peter Heenan replied that he was now able to inform the House that a settlement had been reached whereby the Canadian workmen were re-installed in their old positions at the same wages which they received prior to the dispute.

Forestry Association Officers

Ottawa.—Brigadier-General W. B. White, Montreal, was elected president of the Canadian Forestry Association at the convention here. Directors included Charles H. Edwards, Calgary; T. S. Dixon, J. D. Johnson, and P. A. Wilson, all of Vancouver.

W. N. O. 1775

To Prevent Grain Mixing

Changes in Wheat Marketing To Be Demanded By Western Members

Ottawa.—Drastic changes in the methods of marketing wheat are being demanded by the members from the prairie provinces and those demands will find their echo in the house this session from both Liberal and Progressive members.

When Robert Gardiner, Progressive leader, in the House the other evening demanded the resignation of the present board of grain commissioners and the establishment of a new board of five to administer the Canada Grain Act, he expressed the views of many in the prairie provinces. Yet the Liberals are asking for more.

Before the present session is far advanced there will be a demand for some means to prevent mixing at the terminal elevators, for changes in the personnel of the board of grain commissioners and for action in the direction indicated in the report of the agriculture committee last session regarding the establishment of protein content as the chief measure of the market value of wheat.

Large Butter Consumers

Canadians Use More Butter Than Any Other Nation

Vancouver, B.C.—Canadians are the largest consumers of butter in the world, declared Dr. J. D. Riddick, Dominion Dairy Commissioner, in addressing the Western Canada Dairy Convention here on "Dairy Progress in 1923." Their annual per capita consumption, he put down at 27 pounds to which must be added 3½ pounds of cheese. Increased milk consumption, according to Dr. Riddick, had led to a large drop in butter exports and in this connection he referred to the huge consumption of dairy products by the automobile tourists who annually invaded Canada. This trade alone now accounts for between 12,000,000 and 15,000,000 pounds of butter every year.

Pay Well For Extra Work

Delegates To Reparations Conference Lavish With Tips

Paris.—Delegations to the reparations conference have made the employees about the Hotel George V, where its sessions are held, happy. The conference has entailed considerable extra work for the hotel maidens and the delegates have not been slow to repay it with tips.

Particularly have the telephone switchboard personnel benefited. There is just one grumbler. "Ernie the barman, who says the delegates are the poorest customers he ever had and that he has yet to serve either delegate or substitute at his bar."

"It would seem," he says, "that an (certain) delegates are from prohibition countries."

Rapid Comeback For Britain Predicted

Sir Alfred Cope Sees End Of Period Of Depression

Montreal.—That Great Britain was rapidly coming to the end of the period of depression and that she would come back to the foremost position she once held was predicted by Sir Alfred Cope, under-secretary of state for Ireland from 1912 to 1922. He is at present managing director of the Amalgamated Collieries of South Wales and is here in the interest of marketing Welsh coal in Canada. He said the coal industry had introduced economies long overdue.

Next Convention In West

Canadian Swine Breeders' Association Will Likely Meet In Regina

Quebec.—A resolution asking the provincial governments to conduct further researches in an effort to control the ravages created in intestinal parasites in the swine herd was adopted by the Canadian Swine Breeders' Association at its annual meeting here. More than one hundred swine breeders from all over the dominion were in attendance. The next meeting of the association will take place in Western Canada, probably at Regina.

Had Narrow Escape

Alfreton, Derbyshire, Eng.—Passengers on the liner, express from London to Glasgow had a narrow escape when the locomotive baggage coaches were derailed but the coaches kept to the rails. No passengers were injured but the express messenger and firemen were missing and believed to be under the derailed locomotive.

Trapped In Burning Cabin

Neighbors Unable To Effect Rescue Of Three Prospectors

Stout Lookout, Ont.—Trapped by flames in their tiny cabin, three prospectors lost their lives at the narrow Woman Lake Portage, according to word reaching here. With them perished their four dogs which were chained to the outside of the building.

The three victims were Tony Tyrell, and men named Gougan and Viogt.

No word is yet available as to where the three came from. Terrified barks of the dogs roused R. F. Dynes, sleeping in a shack some distance. He rushed outside to see the cabin in flames but found it impossible to effect a rescue. He could not even get near enough to release the still living dogs.

Word of the tragedy was brought out by aeroplane.

WILL MAKE BID FOR LARGE AREA IN FAR NORTH

Ottawa.—While cabinet ministers and western members of Parliament will not discuss, openly, the announcement that Premier J. G. Gardiner, of Saskatchewan, will seek a vast extension of the area of that province when he comes here to confer with the Dominion Government, there is the keenest interest in his proposition.

The reaction on the whole, is most unfavorable and no one appears ready even to consider the possibility of granting to Saskatchewan the territory immediately to the north of Manitoba.

This attitude of course is more marked among Manitoba members than others, but the general view of eastern members and ministers is that to grant Mr. Gardiner's request would precipitate a quarrel between the provinces which would have far-reaching results and might, conceivably, become an outstanding national issue.

Some members believe that no change in the present boundaries should be made until the northern areas are populated and that there should then be created new provinces to the north of the present prairie provinces. However, the majority of members agree that this ought not to be done, but that, when the time comes, the present provinces should be extended northward.

The motives behind Mr. Gardiner's demand are well appreciated here. The area to the north of Manitoba and Saskatchewan extending to the Arctic Ocean and bounded on the east by Hudson Bay and on the west by a line drawn from Coronation Gulf to the present western boundary of Saskatchewan is potentially one of the richest mineralized areas in Canada. About one-third of the famous pre-Cambrian shield lies in this northern territory, and active prospecting financed by two of the wealthiest mining corporations in Canada, is proceeding north of Chesterfield Inlet and along the Copper Mine River, running into the Arctic Sea. Within a few years tremendous mining development may take place in this northland.

The area to the north of Manitoba and Saskatchewan extending to the Arctic Ocean and bounded on the east by Hudson Bay and on the west by a line drawn from Coronation Gulf to the present western boundary of Saskatchewan is potentially one of the richest mineralized areas in Canada. About one-third of the famous pre-Cambrian shield lies in this northern territory, and active prospecting financed by two of the wealthiest mining corporations in Canada, is proceeding north of Chesterfield Inlet and along the Copper Mine River, running into the Arctic Sea. Within a few years tremendous mining development may take place in this northland.

A CRUISE OF CONTRASTS

With tiny tugs punting in their efforts to nose the twenty thousand ton Canadian Pacific liner "Duchess of Athol" into the stream, 350 passengers left New York recently on a "Cruise of Contrasts" that will take them to twenty ports in the West Indies, South America, Africa, Egypt, Italy, Monaco and France.

This is the second South America-Africa cruise by a Canadian Pacific ship. Last year it was undertaken by the "Empress of France," the first ship to land goods at the lonely island of Tristan da Cunha successfully. The visit to this isolated spot is one of the most romantic episodes in the lives of the cruisers, and when they return to Canada they will have the distinction of being among the seven hundred non-scarfing people ever to have that opportunity.

PASSENGER EXAMINATION

C. B. Kay, the first Canadian student to pass the final examination of the chartered institute of secretaries, London, England.

Consider Tunnel Idea Nothing But Gamble

Should Not Be Started Without Investigation, Is Opinion Of Expert Engineer

London, Eng.—The project for the construction of a tunnel under the English Channel is a gamble.

This is the considered opinion of John Dymally-Hay, one of the world's authorities on tunnel engineering, who, in an interview with International News Service, declared the construction of the tunnel should not be decided upon in the first flush of enthusiasm.

Dymally-Hay's word must be received with deference. He is an engineer with unrivaled experience in this sort of work. He acts as consulting engineer for the company controlling London's subways, and has had the design and supervision of 500 miles of underground tunnels in London.

"The channel tunnel project is a gamble purely and simply because there is no authority who can say with certainty what may be the thickness of the strata in the middle of the English Channel."

"Again the whole thing is a gamble because it is being done blindfold. As a practical engineer, I say that there is not a particle of real evidence to show the thickness of the strata under the sea. Geologists say they have taken fossils and samples from the sea bed, but to an engineer that is just moonshine. He knows nothing of the depth of the chalk."

Will Make No Change

Thanksgiving Day and Armistice Day To Be Celebrated As Two Distinct Festivities

Ottawa.—Thanksgiving Day and Armistice Day will continue to be celebrated in Canada as two distinct features of national life, the one in acknowledgment for the bounties of Providence, and the other in homage to the memory of Canada's sons and daughters who gave their lives in the great war. This was affirmed when the House of Commons rejected a resolution introduced by F. W. Gerslaw (Liberal-Progressive, Medicine Hat), the purpose of which was to combine both Thanksgiving and Armistice Days into one holiday, on November 11, annually.

May Require Aid Of British Parliament

To Smooth Out Difficulties In Connection With Manitoba Act

Ottawa.—The possible necessity of involving the legislative machinery of the British Parliament to smooth out certain difficulties of certain lands in Manitoba, was raised by R. W. Craig, counsel for the province, at a session of the Manitoba natural resources hearing.

Mr. Craig, during the course of his argument, pointed out that the British Parliament had passed the Manitoba Act of 1870 and provision had been made whereby it could not be changed by the Dominion parliament.

It might be necessary, in order to change the present financial terms between the provinces and the Dominion, to have the British Parliament validate such change by statute, Mr. Craig declared.

Historical authorities were quoted and precedence cited by Mr. Craig in support of his contention that the Dominion's interest in the province's lands were primarily of legislative jurisdiction and did not involve proprietary rights.

Stricter Penalty For Violating Drug Act

Amendments Under Consideration To Curb Traffic In Narcotics

Ottawa.—The House of Commons considered in committee of the whole a bill to amend and consolidate the opium and narcotic drug act. The measure provides increased penalties in cases of conviction for selling, giving away, or distributing drugs without a license from the minister of national health. Under the clause inserted a judge may at his discretion, sentence a convicted person to be imprisoned in addition to the imposition of fine and imprisonment. A further change provides that persons guilty of infractions of the act shall be liable to payment of costs of prosecution. Other amendments are incorporated, a number of which are for purposes of clarity.

INTENSE COLD IN EUROPE CAUSES GREAT SUFFERING

London, Eng.—The almost unprecedented stage of cold weather has taken a great toll of life in Europe in the last week, and despatches from almost every country between the North Sea and the Bosphorus brought reports of most critical situations.

Deaths due directly and indirectly to the cold weather have gone well over 10,000 since Monday, and there appeared to be no weakening of the grasp of the most severe winter in the memory of living men.

At Lauen, the French sentry on duty with the army of occupation in Germany, was frozen to death in Germany, was frozen to death. Forty other sentries collapsed due to cold and as many as possible were withdrawn from duty. The temperature was 11 below zero at Wiesbaden.

Advices received by Central Radio at Vienna said 10,000 persons had assembled at one point in Budapest to receive coal rations from the Hungarian government.

Several deaths due to cold were reported from Budapest, including a night watchman and his wife, who were frozen. The Hungarian capital was paralyzed by snow, which halted virtually all traffic, the United Press correspondent reported.

England was swept by severe snowstorms and communications were disrupted. The influenza epidemic, combined with cold and cold weather accidents, has caused most of the deaths which have reached a total of well more than 16,000 during the winter, according to reliable statistics from 11 capitals.

The statistics include: France—2,500 deaths due to influenza and similar diseases.

England and Wales—2,100 deaths due to influenza, cold, shipwrecks.

Spain—1,500 deaths due to shipwrecks, influenza and cold.

Germany—1,400 deaths due to influenza in larger German cities.

Czechoslovakia—Influenza epidemic increased death rate in last two months by 55 per cent. in rural areas.

Italy—Scores of deaths attributed to cold, and estimated increase of four per cent. in death rate.

Holland—200 deaths from influenza and shipwrecks.

Austria—150 deaths in Austria due to cold and influenza.

DECIDE AGAINST ANY RETURN TO TITLES IN CANADA

Ottawa.—There will be no return to titles in Canada. By a vote of 114 to 59 the House of Commons defeated a resolution moved by C. H. Cahan, Conservative member for St. Lawrence-St. George, which raised once more the vexed question of the granting of titles in Canada.

The vote cut across party lines. It showed the Prime Minister and Hon. R. B. Bennett, Conservative leader, uniting in support of the motion. It divided the cabinet, the majority of its members present opposing the resolution. It divided the Liberal and Conservative parties, the majority of liberal members present opposing the resolution, while the majority of Conservatives found themselves in support of Mr. Cahan's proposal.

Only in the smaller groups of the house was there unanimity of opinion. Progressive members of the U.F.A., Independents, and Labor members all united in opposition to the resolution.

Mr. Cahan's resolution did not advocate the return of titles to Canada. It asked merely for the appointment of a special committee of the commons, consisting of 11 members, to "investigate a report upon the advisability of qualifying, amending, or rescinding the address to His Majesty the King, which was adopted by this house in May 1919, dealing with the conferring by His Majesty titles of honor or titular distinctions upon His Majesty's subjects domiciled or ordinarily resident in Canada."

It also asked that the committee consider and report upon the acceptance or use by persons in Canada of titular distinctions conferred by foreign governments.

The debate, however, indicated that many members felt that acceptance of the resolution might prove to be the thin edge of a wedge which would open the way for a return of titles. The recent discussion was featured by a statement by Hon. Charles Dunning, minister of railways and canals, that not one member of the government favored the restoration of titles in Canada.

Mr. Cahan, himself, who closed the debate, pointed out that his resolution contained not a word about the restoration of titular distinctions. Personally, he did not advocate the revival of titular distinctions in Canada, but he felt that His Majesty should be in a position to reward merit with some simple recognition on the advice of the government of the day.

A number of members who participated in the discussions voiced strong opposition to the conferring of titles. William S. Irvine (C.F.A., Wetaskiwin), expressed the view that a really big man did not require a title, and a man who was not big could not be helped much by tagging one on.

Reparations Payment

Amount Of \$2,500,000 To Settle Claims To Canadian Citizens

Ottawa.—Shortly before adjournment of the House of Commons, Hon. Fernand Rinfret, secretary of state, moved the adoption of a resolution for the payment of reparation claims to Canadian citizens up to a total amount of \$2,500,000. Debate was adjourned.

Strong opposition was voiced by Hon. H. H. Stevens (Conservative, Vancouver Centre) against the amount which the government proposed to pay. Mr. Stevens believed that with the exception possibly of a certain class of claims, all amounts approved by the reparations commissioner should be paid in full.

Planning Market Branch

Vancouver.—Official announcement that the provincial government intended to shortly establish a market branch was made by Premier S. F. Tröme, at the banquet here of the Western Canada Dairy Council convention.

Honor List Expected

London, Eng.—It is expected the King's honors list, postponed from New Year's Day on account of His Majesty's illness, will be published before the end of the present week. It is understood it will be very short and will not confer any peerages.

Heads League Society

Ottawa.—Dr. H. H. Tröme, president of the National Research Council of Canada, was elected president of the League of Nations Society at the seventh annual meeting held recently.

SUN LIFE ASSURANCE COMPANY OF CANADA

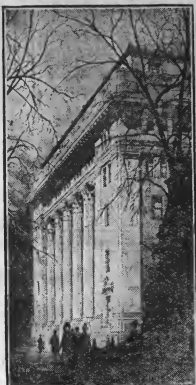

A TOWER OF STRENGTH

1928

Assurances in force (net)	- \$1,896,915,000
An Increase of \$408,925,374	
New Assurances Paid for	- 441,244,000
An Increase of \$112,836,000	
Total Income	- 144,747,000
An Increase of \$41,972,000	
Surplus earned during the Year	- 40,264,000
Payments to Policyholders and Beneficiaries	- 49,920,000
Surplus and Contingency Reserve	- 66,938,000
An Increase of \$9,157,000	
Total Liabilities (Including Paid up Capital)	- 422,020,000
Assets, at December 31st, 1928	- 488,958,000
An Increase of \$87,652,000	
Rate of Interest earned on mean invested assets (net)	6.58%

DIVIDENDS TO POLICYHOLDERS INCREASED FOR NINTH SUCCESSIVE YEAR

The Company has also inaugurated the practice of paying a special maturity dividend on participating policies, less or more years in force, terminating by death or maturity.

EXTRACTS FROM DIRECTORS' REPORT

... After deducting amounts re-assured, the total assurance in force now amount to \$1,896,915,374, an increase of \$408,925,374. Policies in force number 633,240, and in addition 136,293 certificates of assurance are held by employees of corporations and firms under the group plan.

While every field of operation contributed its full share to these impressive advances, the rapid development of our business in Great Britain and the United States is especially noteworthy. The generous reception of our Company in countries served by powerful domestic institutions is particularly gratifying, as testifying to widespread appreciation of our record and services.

... The amount paid to policyholders since organization, together with the amount at present held for their security or benefit, exceeds the total amount received from them in premiums by \$11,170,228.10.

The strength and resources of the Company have been still further enhanced.

The net rate of interest earned on the mean invested assets, after making provision for investment expenses, has risen to 6.58 per cent. Dividend increases, bonuses and stock privileges, accruing on many of the Company's holdings, contributed substantially to this gratifying result.

A net profit of \$11,028,854.59 has been realized from the redemption or sale of securities which had risen to high premiums.

The securities listed in the assets have been valued at figures substantially below the values placed on them by the Government. This under-valuation of our securities represents an important safeguard against possible adverse market fluctuations, additional to the reserves specifically provided against that contingency.

We are again able to report that on the bonds and preferred stocks listed in the assets, not one dollar,

due either as interest or as dividend, is in arrear for a single day; while the dividends accruing to common stock exceed by several million dollars those payable on the same stocks at the time of purchase.

The surplus earned during the year, based on the values given in the accounts, amounted to \$40,264,088.52.

\$10,000,000, has been deducted from the already heavily marked-down value of securities, as additional provision against possible fluctuations, increasing the amount so set aside to \$20,000,000.

The special amount set aside as a liability to provide for unforeseen contingencies has been maintained at \$12,500,000.

\$15,822,339.65 has been paid or allotted as profits to policyholders during the year.

After making all deductions and allocations, \$9,157,966.34 has been added to the undivided surplus, bringing the total over liabilities, contingency accounts, and capital stock, to \$54,438,862.48.

The continued prosperity of the Company enables your Directors to announce, for the ninth successive year, a substantial increase in the scale of profits to be distributed to participating policyholders during the ensuing year.

In addition, your Directors have inaugurated the principle of granting a Special Dividend on participating policies maturing after having been in force ten years or longer. This new bonus will enable policyholders or beneficiaries whose withdrawal is occasioned by the maturity of policy contracts, to participate in the accumulated surplus which it has not as yet been considered prudent to divide.

The effort to provide life assurance at the lowest net cost obtainable has been increasingly appreciated. Our policyholders will be gratified by this further evidence of our desire that the Company's property shall be fully shared by its members.

NOTES AND COMMENTS

Hockey games in Coleman will soon be over, as the rink directors contemplate closing the rink at the end of February. Unfortunately the revenue derived will not permit it to remain open longer, and there is also the possibility that with the opening of March milder weather will be experienced.

The winter has seen a revival of hockey enthusiasm in the town, and among the younger boys it is pleasing to note that teams have been organized. In the course of time many of them will pass into the senior ranks, and it is well that there should be this incentive. Recreation such as hockey and winter sports of all kinds provide are the best antidote to mischief and trouble, and should be encouraged by parents.

Youthful energy seeks an outlet, and if there is not an avenue of a healthy nature where this energy may be expended, there are many pitfalls in the way of vice and unhealthy pastime. The need for the encouragement and promotion of winter sports need not be further emphasized.

People living in the mountains have an advantage over prairie dwellers.

The prairie is flat and monotonous, and though one may glory in the vast open spaces, it is very drab compared to the majesty and scenery of these Rocky Mountains. Here the exertion of walking up and down hills gives the necessary exercise of which we are all prone to take too little, and there are countless attractions for those who love to leave the beaten path of the automobile and railroad and explore the forest trails or with sturdy pack-horse climb some of the heights. Yet it is surprising how comparatively few people who, having lived for years in the mountains, never attempted to climb even Saskatchewan hill, from which a glorious view can be obtained. Some adventurous spirits have made the ascent of Crows Nest Mountain, and expressed themselves as feeling well rewarded for the effort. It is a fact that the beauties that lie closest to us as a rule are not appreciated at a fraction of their value, whilst others living at a distance just long for them.

With the completion of the gravelled trail between Macleod and Pincher Station, and the straightening out of the Red Trail between Crows Nest Lake and the station at the Divide, the finest road in Southern Alberta through the Rockies will be complete and available for traffic most of the year. The only obstacle will be snow in winter, but even this will probably be eliminated if the same example is followed on the Alberta side as on the B. C. side of keeping the road open with a snow plow. This route will become increasingly popular as part of the circle tour including Banff and Windermere, while the completion of the trail from Pincher Creek to Waterton Lakes Park will add to the popularity of this southern route. Pass towns should be alive to the importance of tourist traffic, for though there may not be the inducement to tourists to remain for any length of time, yet necessity might often compel them to stop over for a brief period, during which the chances are they will make purchases of some kind. Above all, civic pride should be an incentive to the towns on this route to present the best appearance possible.

News despatches recently told of wolves attacking people in towns of Central Europe during a severe wintry spell. This reminds one of a story appearing some years ago in one of the sensational journals published in the United States, stating that wolves had besieged homesteaders in their shacks in the border district of North Dakota, on the boundary of Saskatchewan. When it was read by the farmers of that district, they enjoyed the joke immensely, as the only wolves they had seen were those they hunted for the sake of receiving the government bounty of five dollars a head, and they needed a lot of racking to get them, so that the bounty was well earned. These sensational stories of wild animals usually may be taken with general

trains of salt. Most of the wolves we have seen keep to the tall timbers or out of man's way, for instinct tells them that self-preservation is the first law of nature.

It is time that somebody came around with a good wild animal story of this district, as no cougars have been reported for some time. The last one turned out to be a porcupine, which two adventurous ferrier dogs

found out to their sorrow.

The Canora Courier tells the citizens that boosting is a job for everybody, especially the business men, and not for the editor alone. It is not only necessary for business men to advertise but to take an active part in community activities. To expect a publisher to "boost" where there is no enterprise or community co-operation is ridiculous.—The Govan (Sask.) News.

Canada's Aggregate Trade Shows Remarkable Increase In the Last Fourteen Years

Each recurring year comes as a call for personal and national stock-taking. The first concerns the individual personally, the second is the concern of every patriotic citizen. So it is not amiss to consider the position of Canada on her material side and as occupying a place in the world economy out of all proportion to the nation her population bears to that of the principal countries that are her competitors in the open markets of the world. At the end of 1927 the Dominion ranked fifth in the volume of her imports, exports and general trade, yielding rank in these respects only to the United Kingdom, United States, Germany and France, all nations of greatly larger population. Following Canada, in the order of their trade aggregates, come British India, Japan, Italy, Argentina and the Netherlands.

That Canada should occupy so honorable a position in the trading roster of the world is a matter of legitimate pride, heightened by the rapidity of the Canadian expansion. In 1913, the year before the war, Canada ranked only eighth in the volume of her imports, and ninth in aggregate trade. The Dominion's rise to fifth place in aggregate value thus lies entirely within the war and post-war periods and is both remarkable and, probably, unparalleled in trade history. Moreover, it is even more surprising when it is kept in mind that Canada still numbers less than 10,000,000 people, and that her increase in population has been relatively slow. In fact, the Dominion takes a much higher place when the point of view is restricted to per capita trade.

In the last complete calendar year before the outbreak of war, Canada ranked seventh in that regard among the countries of the world in export trade, but in 1927 had risen to second place, out-ranked by New Zealand alone. In import trade Canada ranked seventh per capita in 1913, rising in 1927 to fifth. In aggregate trade per capita Canada moved from sixth place to second in the same period, being preceded by the much smaller Dominion of New Zealand. Taking the visible trade balance, Canada held third place in 1927, following the United States and British India, but on a per capita basis, the Dominion led the world.

Canada's fiscal year ended March 31, and for the last complete year to that date in 1928 her aggregate trade was returned at \$2,325,896,934. This represents an increase in fourteen years of \$4,240,635,585, or 114 per cent. Import trade has increased from \$899,022,292 to \$1,097,117,930 by \$398,095,538, or 57 per cent. Export trade has increased from \$983,232,057 to \$1,238,782,004 by \$255,549,947, or 25 per cent. The value of Canadian trade continues to increase, further increments being recorded in the present year. Comparing the aggregate for the 12 months ended July last with the previous corresponding twelve months, an increase is shown of over 5 per cent, both imports and exports being appreciably greater.

Business Is Increasing
The Manitoba Cordage Company reports a year of steady progress. A crop of approximately 1,200 acres of hemp was planted during the year as compared with 600 acres during 1927. Four hundred acres of hemp were grown at Rhin, Saskatchewan. Manufactured products are meeting with a favorable reception and a gradually increasing business is being done.

Self-defence is the clearest of all laws and for this reason—the lawyers did not make it.

Mexico produced almost 26 per cent of the world's oil in 1920.

Idea Of University Training

When Properly Applied It Is Most Valuable Asset

"A university training is the great ordinary means to a great but ordinary end; it aims at raising the intellectual tone of society, at cultivating the public mind, at purifying the national taste, at supplying true principles to popular enthusiasm and fixed aims to popular aspiration, at giving enlargement and sobriety to the ideas of the age, at facilitating the exercise of political power, and refining the intercourse of private life. It is education which gives a man a clear, conscious view of his own opinions and judgments, a truth in developing them, an eloquence in expressing them, and a force in urging them. It teaches him to see things as they are, to go right to the point, to disentangle what is confused, to detect what is sophistical, and to discard what is irrelevant. It prepares him to fill any post with credit, and to master any subject with facility. It shows him how to accommodate to others, how to throw himself into their state of mind, how to bring before them his own, how to influence them, how to come to an understanding with them.—John Henry Newman.

Individual Chic

Its individuality and wearability will appeal to the thrifty woman who chooses practical daytime clothes. The surplus cut of bodice and vestee makes it quite suitable for woman of average full figure. The two-piece skirt cut on conservative lines is just slightly flared. The crushed grille to give smooth neckline is shirred at right side with sash end attached under closing at left side. Style No. 359 chooses sheer wools with faille crepe vestee. Printed sheer velvet, crepe satin, canton-crepe, flat silk crepe and wool crepe are suitable fabrics that can be worn for shopping or afternoons. For the 36-inch size 3½ yards of 40-inch material with ¼ yard of 40-inch contrasting is sufficient to copy it exactly. Pattern designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Canada's Copper Production

Government Report Indicates Large Increase In This Industry

Within five years Canada will produce approximately 250,000 tons of metallic copper annually, or roughly ten times the present consumption of the Dominion's industries utilizing this metal, according to present indications and calculations of experts of the Mines Branch of the Department of the Interior, upon a basis of minimum production of newly-developed mines in the Dominion.

Under existing conditions the bulk of the copper thus produced would be refined in the United States and be shipped back to Canada. This would be the case, at least, until the establishment of a smelter at some suitable point which could refine the production of Canada's eastern mines and the re-opening of the huge smelter at Trail, B.C., which has been closed since the cutting off of its supply of copper ore from the Great Consolidated holdings at Copper Mountain, now shipping to Tacoma, Wash., for smelting purposes.

Believes Greenland Route Most Logical

Only Solution To Problem Of Trans-Atlantic Airplane Travel Says Michigan Professor

Prof. W. B. Hobbs, of the University of Michigan, who is laying tentative plans for a fourth expedition into Greenland, believes that the only satisfactory solution to the problem of trans-Atlantic airplane travel lies in the Greenland-Iceland route.

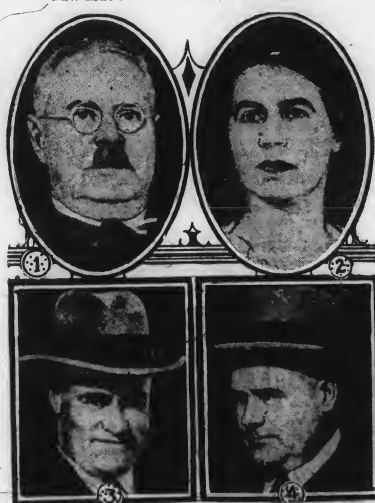

Care Of Cut Flowers

Flowers must be taken care of by the purchaser. When you open a box of cut flowers from the florist's stems have air in them. So it is not enough that you put the flowers immediately into a vase of water. Cut off about half an inch at the end of the stems and immerse the stems in warm water till the flowers are up to their necks in the liquid. Then the water passages will soon be filled and the flowers are ready for the vases.

Memorial For Pioneer

Near Lethbridge, Alta., a monument consisting of a stone cairn has been erected to commemorate the discovery of a coal mine and the pluck of its finder. Nicholas Sheran was a pioneer of 1872. He was made of stern stuff, for his market, Fort Benton, was 200 miles away. To cart the precious fuel to his market he employed bull teams and many weeks of hardship and toil it must have taken him.

NEW LIEUTENANT-GOVERNOR AND FAMILY

Above is a recent picture of J. D. McGregor, his wife and two sons, Mr. McGregor was named by the Rt. Hon. Mackenzie King to fill the position of lieutenant-governor of Manitoba, which has been vacant since the death of the Hon. T. Arthur Burrows. Picture (1) Mr. McGregor, (2) Mrs. McGregor, who will act as hostess at the Government House, and (4) are Kenneth and Allan McGregor, his two sons, who have large stock farms in New York and North Dakota, but are home to help their father while he is in office.

GOING TO NEW SCHOOL

Miss Edith Elster, teacher at a Toronto public school, is among the 12 teachers who will be sent to one of the other dominions as an exchange instructor for one year.

Supplementary Ration For Breeding Poultry

Good Results Obtained From Use Of Cod Liver Oil

It is now being recognized that the fertility, hatchability, and viability of eggs may be influenced by the manner of feeding the laying hens. During the hatching season the Experimental station at Kentville, N.S., carried out an experiment to determine the effects of using supplementary feeds as cod liver oil, raw liver, bone meal, etc., when added to the regulation ration given to the breeding stock. The regulation ration used consisted of dry mash made up of 100 pounds each of cornmeal, oatmeal, bran and middlings, and 50 pounds of beef meal, ½ pound of salt was added to every 100 pounds of the mixture. The test groups of hens were fed alike this mixture, in addition some of the hens received, when fed singly, cod liver oil, one teaspoonful to four birds daily; raw liver, half an ounce per bird daily, and bone meal, five per cent. by weight of dry mash. When these special feeds were given in combination only half of these amounts were used.

The experiment was divided into two parts with a week elapsing between them. The results of this experiment are given in detail in the report of the superintendent of the station for 1927, published by the Department of Agriculture at Ottawa. The most outstanding conclusion to be arrived at from the study of this report, which may be obtained at the Publication Branch, is that the pen using the cod liver oil were out, standing, particularly in the percentage of hatchability of eggs-laid.

Placing the Blame

"Do you claim that your wife dragged you down to this awful plight?"

"Yes, lady; she's the cause absolutely."

"And how did she ruin you?"

"Well, it's like this. I got 'er three good jobs and she lost them all by 'er 'ighlandness.'"

First Letter Was Carried By International Air Mail Nearly a Century Ago

Forming New Dominion

Territories in East Africa Uniting Under British Flag

A "black dominion" of 10,000,000 persons governed by a scattered handful of white men under the British flag is slowly taking shape in East Africa.

The project includes the vastly rich Tanganyika area. Tanganyika covers 375,000 square miles and has been held by Britain under a mandate since the war. Uganda and Kenya are the other proposed component parts of the new dominion of the British Empire.

A hint of the proposals is found in the report of a commission investigating conditions in East Africa, under the chairmanship of Sir Edward Hilton Young. The commission recommended further improvement in administration and appointment of a high commissioner for the three territories. This might eventually lead to creation of the post of governor-general, according to certain quarters and the first step towards creation of a dominion.

Kenya is the largest white colony, numbering 12,500. The 422 officials there rule some 2,735,000 natives. They are slowly developing a great trade in cotton, hides, ivory and timber with Britain and the United States.

Nairobi, capital of Kenya, is a little city planted in the midst of the jungle.

Tanganyika has a population of almost 4,000,000. Uganda which has been under British rule since 1894, has 3,200,000. In each territory the natives are slowly being educated.

Some observers are of the opinion that the British plan is ultimately to link up these territories with Northern and Southern Rhodesia, which are to the south and under British rule. Then, it is pointed out, the legislative link might be extended to the even larger territories of the Union of South Africa.

See Snow-Garbed-Rockies On Skis

Party Explores Tonquin Valley and Maligne Lake

The magnificent scenery of the Tonquin Valley is greatly magnified by its winter mantle of snow, according to four men who have been seen in the valley. Warden Macklin, Frank Borstrom, Joe Velas and R. Morrison have returned to Jasper after three days' exploring. Using a log cabin as their base, they visited Chocoma Lake, Amelby Lake, Moat Lake and the charts about the base of Tonquin Hill. They encountered five feet of snow on the elklands, and good skiing conditions. Much of the small bush and low trees of the summits was covered by deep snow, which provided a much larger ski-ing surface than would appear to the eye of the visitor in the summer time. The return route was from the Macarib Pass and down the Portal Creek valley to the Edith Cave motor road and the main Athabasca Valley.

The same group skied down Maligne Canyon to Medicine Lake cabin, a distance of about 13 miles, pushed on another 10 or 11 miles to Maligne Lake and spent some time in these magnificent surroundings. They saw a large herd of caribou on the west shore, about a mile from the chalet, many deer and abundant moose tracks. Among the animals they saw on the Tonquin trip were caribou, wolverine and lynx.

Idea Was Not a Success

The impotation of two pairs of reindeer into Switzerland last spring has not proved successful. Of the four animals which arrived in Chateau d'Oex only two now remain. During the exceptionally hot summer both the males died, as did two young ones, born in June. This will be a disappointment to the winter sports enthusiasts, who were looking forward to a new form of skijoring, in which the reindeer was to have taken the place of the horse as motive power.

Subject To Question

Although a tablet on a London tavern states that Samuel Pepys the famous diarist, was born in house on that site, there is doubt about it. No one really knows whether he was born in London or in a Huntingdonshire town.

Containing only three streets and less than one hundred houses, St. David's, in Pembroke, England, has a famous cathedral and is entitled to call itself a city.

An interesting "story of the first air mail," a story that must be little known, was sent to the Manitoba Free Press from the Winnipeg vice-consulate of the Netherlands. The story explains how:

"The first letter known to have been sent by international air mail was received by Willem J. King of the Netherlands, more than 92 years ago. It happened on Nov. 7, 1836. On that day, Robert Holland, a British capitalist, accompanied by Monk Mason and Charles Green, embarked in a balloon for a trip across the North Sea channel. The King's councillor-general at London, Mr. J. W. May, handed the balloonist a letter addressed to the King of the Netherlands. The balloon landed at Wellburg, Germany, where the letter was mailed to The Hague. King Willem was so delighted with the novelty of the fact that he ordered the letter to be filed with the annotation 'to be carefully saved.'"

Of course this disclosure of mail delivery made by balloon nearly a hundred years ago is a sharp contrast illustrating the advances in the uses now made of the air. Indeed, where a start even had not been made, an advance can hardly be recorded. Controlled aerial locomotion is so new that it did not exist when balloons were tossed about at the mercy of each whiff of wind. When the King of the Netherlands thought wonders had ceased when his letter descended with the balloon which transported it, nothing was known of air craft and no service as we have come to know them. Nothing of this was known at the beginning of last century, and little more at the beginning of this one. Knowledge of transport's newest dimension manifested itself only in the last quarter-century, and the greatest strides in putting it to the most astounding practical uses have been taken in the last ten years or so.

As the vice-consul of the Netherlands remarks, "Today the sending of mail from Holland to the Dutch East Indies, and return, a distance each way of about 10,000 miles, is a common occurrence." And he asks, "What would King Willem have said if he had received a letter from Batavia or Sourabaya, written ten days previously, and reading, 'We hereby confirm our telephone conversation held this morning, etc.'? Yet such letters are actually being received in Holland today."

Whatever the King of the Netherlands would have thought of this rapid communication, he couldn't, a hundred years ago, have regarded it as much more unlikely and wholly impossible than did most of this generation at the beginning of this century. And it is altogether permissible to presume that the King of the Netherlands referred to would be little more perplexed at the advances made in their since his time, than we would be with the further advances that will be made in the next fifty or a hundred years.

Auto Blazes Northern Trail

The second automobile to make its difficult way over rough trails and toad roads from Saskatoon, Sask., to The Pas, arrived there recently. The motorists were E. E. Smith and S. Johnson, of Saskatoon. Until they journeyed to The Pas no motor car had made the trip since John Brennan drove over logs and muskegs in 1924.

"He sure believes in Farm Relief." "Yeah?"

"Yeah, just foreclosed the mortgage on a relieved me of my farm."

Pedestrians should be seen and not hurt.

"All my ancestors died of throat trouble."

"Laryngitis?"

"No, a tight rope."—Buen Humor, Madrid.

BLUE RIBBON COFFEE

Packed in vacuum tins to preserve aroma and flavour. Get a tin and try it.

WORLD HAPPENINGS BRIEFLY TOLD

The Canadian Chamber of Commerce has decided to affiliate with the International Chamber of Commerce with headquarters at Paris.

A great swarm of locusts, which were devastating Palestine, were driven into the eastern deserts by the high winds and the crops are saved.

Hugh Lawley, an Oxford man, has patented a radio set, of four tubes, that he has built into a miniature grandfather's clock.

Lily Langtry, famous actress and long known as the "Jersey Lily," died recently at Monte Carlo from an attack of bronchitis.

The Greek chamber of deputies has ratified the Kellogg anti-war treaty and the non-aggression pact with Italy.

Canadian breeders will exhibit in the neighborhood of 1,000 birds at the World's Poultry Congress to be held at Crystal Palace, London, in July, 1930.

Russia, Poland, Rumania, Estonia, and Latvia have signed a protocol by which the terms of the Kellogg-Briand renunciation of war act are placed into effect immediately as between themselves.

It is authoritatively stated that the two British cruisers upon which construction started a few weeks ago will be 10,000 tons each, the maximum displacement under the Washington treaty.

The Associated Press learns on good authority that Dr. Hjalmar Schacht, president of the German Reichsbank, reports that reparations experts that Germany could no longer pay at the present rate under the Dawes plan.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection, followed often by death may result from prying corns with an infected razor. Quick, safe relief comes from using PUTNAM'S CORN EXTRACTOR. It afflicts with corns, callouses or sore foot-humps, use "PUTNAM'S"—it's reliable, and sure to shroud up the corns so they drop right off. No pain, no soreness, but quick relief from sore corns comes to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

In the building of a railway line in French Equatorial Africa, 17,000 negro laborers have died from disease, privation and exposure.

There are only 3,000 veterinary surgeons in England.

FARMER'S-WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound for about the third time. It has helped me so much. I cannot get it too highly. I was troubled with head aches and my limbs were heavy so I could hardly walk. I do my farm work. I saw in the newspapers your ad about the Vegetable Compound and thought to give it a trial. The first bottle gave me relief and I have told others what it does for me. I am willing for you to use my letter if you choose."—Miss D. B. Peters, Wilton, Ontario.

Suggests Fire Insurance Pool

Prairie Provinces May Carry Own Risk On Schools

Suggestions to the school trustees' organizations of Saskatchewan and Manitoba that a fire insurance pool be undertaken on the three prairie provinces covering insurance on school buildings will be made as a result of the adoption of a resolution by the Alberta School Trustees' association at its annual meeting in Lethbridge.

A report was received from W. E. Turner of Calgary, delegated last year to investigate the possibility of the schools of the province organizing their own fire insurance scheme. His report showed that, on the insurance premiums paid and losses of the past two years, the Alberta boards could build up a half million insurance fund in five years and it was felt that if Saskatchewan and Manitoba would come into the undertaking the plan would have good chance to succeed.

Calgary was chosen as the convention city for the 1930 convention.

Another British Stronghold

Harbor At Malta One Of World's Greatest Naval Stations

The island and harbor at Malta, under British management has been converted into one of the greatest naval and coastal stations in the world. Its strength and impregnability it is said to rival the famous rock of Gibraltar.

The old fortifications were useless against attack of modern aircraft, and the British have completely altered the naval batteries and land defenses of the islands. Today they are among the most formidable in the world.

A large military and civil airbase has been constructed at Hal Fux, making another link in Britain's world-wide system of air communication. A floating dry dock, capable of accommodating the largest vessels in the world, as well as new refitting yards, large magazines and many other improvements, have been completed.

Malta is the headquarters of the British Mediterranean fleet, probably the most powerful flotilla of warships afloat, and is also one of the most important ports of call in the world. It lies midway between Gibraltar and Port Said. Although in area Malta is three times the size of Manhattan Island, it has only one-tenth the population of the Borough of Manhattan. The last census showed less than 225,000 inhabitants.

KEEP YOUR BABY HAPPY AND WELL

Every mother wishes her child or children to be well and happy to be bright-eyed, rosy-cheeked boys and girls. No mother, though, can expect her children to escape all the ills of babyhood and childhood, but she can do much to help them fight the battle for health.

All prudent mothers constantly keep at hand the means of adding their little ones when sickness comes suddenly, as it generally does in the case of children. In every home where there are infants and young children, Baby's Own Tablets should be handy. Read what Mrs. Mary Hill, Centre Dunmore, Ont., says concerning her children: "I am the mother of six children and would not be without Baby's Own Tablets. They are a wonderful medicine for little ones."

Baby's Own Tablets are a mild but thorough laxative which regulates the bowels and sweetens the stomach, and thus break up colds and simple fever, banish constipation and indigestion and allay the irritation accompanying the cutting of teeth. They are absolutely safe and are pleasant to take. The Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

GRIDDLE CAKES

Who doesn't like griddle cakes? From father to the youngest member of the family, every one clamors for more—when they are tasty! Here is a tested recipe:

- 1 cupful Borden's St. Charles Milk.
- 1 cupful water.
- 2 tablespoons melted butter.
- 1 egg, well beaten.
- 3 cupfuls white flour.
- 1 teaspoonful salt.
- 4 teaspoonfuls baking powder.
- 2 tablespoons sugar.

Combine the milk and water, add the shortening, sugar, and the egg, and heat in the dry ingredients which have been sifted together. Beat thoroughly and fry as usual on a slightly oiled griddle, or on an un-oiled aluminum or soapstone griddle. If very thin cakes are desired, add two more tablespoons of St. Charles milk and water. For further interesting recipes write for The Borden Cook Book, addressing The Borden Co., Ltd., Dept. W1, 110 St. Paul St., Montreal.

Just about the time you wonder why someone has escaped the penitentiary so long, he comes out as a candidate for some important office.

Good Market For Whitefish

Calgary Man States U.S. Favors Great Slave Lake Product

People in Chicago may soon be eating Canadian whitefish purchased on their home market for 15 cents a pound, according to W. J. Madden, of Calgary, Alta., who was in Montreal recently making necessary rail transportation arrangements.

The fish will be caught in Great Slave Lake, a lake which provides almost virgin fishing waters, according to Mr. Madden. He stated that it abounds in whitefish, a food that is looked upon with favor throughout the United States. He plans to operate a number of five-ton trucks over the ice of the Slave and Athabasca rivers to Watways, and then to Chicago by rail, taking about four days in all to complete the journey. At present, however, the open season for whitefish in Canada ends in February, and Mr. Madden went to Ottawa to seek an extension of the season to the end of March. He believes that if this extension is granted, Chicago will provide an active market for whitefish during the Lenten season.

Persistent Asthma. A most distressing characteristic of this debilitating disease, is the persistence with which recurring attacks come to sap away strength and leave the sufferer in a state of almost continual exhaustion. No wisest precaution can be taken that of keeping at hand a supply of Dr. J. D. Kellogg's Asthma Remedy, famous as the most powerful remedy for eradicating this disease from the tender air passages.

Canada Early Prize Winner. That Canada early took foremost place in fish culture is indicated by the fact that in 1883 at the Great International Fisheries Exhibition in London, she carried off the highest award, namely, the gold medal and diploma for the best and most complete fish-breeding establishment in the Exhibition.

Children suffering from worms soon show the symptoms, and any mother can detect the presence of these parasites by the writhings and fretting of the child. Until expelled and the system cleared of them, the child cannot regain its health. Miller's Worm Powders are prompt and efficient not only for the eradication of worms, but also as a toner up for children that are run down in consequence.

"Daddy," cried the doctor's small son, "I want a drink."

"Sorry," murmured daddy, "I forgot," "but I'm all out of prescription blanks."

The Germans have built a car that will run one half mile on half an ounce of gas. These Christmas cigarette lighters will come in handy yet.

Stop the Cough. Coughing is caused by irritation in the respiratory passage and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Chamberlain's Cough Syrup will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

"So Barker is doing a cash business and making lots of money?"

"Yes, he's feathering his nest with down payments, so to speak."

CHRISTIAN GROWTH

Golden Text: "But grow in the grace and knowledge of our Lord and Saviour Jesus Christ."—2 Peter 3, 18.

Lesson: John 1:40-42; Matthew 16: 15-18; John 21: 15-19; Luke 24: 52; Ephesians 4:11-14; Philippians 1:6, 9-11; 3:12-16; Colossians 1:9-11; Hebrews 6:1-3.

Devotional Reading: John 15:1-3.

Explanations and Comments

Becoming a Follower Of Jesus, John 1:40-42. Peter was in the company of Jesus (read verses 35-39). Andrew sought his brother and told him that he and John had found the Messiah, Messiah (Hebrew, and Christ (Greek), mean "The Anointed One." Hebrew kings were anointed with oil when given their office, and the Spiritual King was thought of as The Anointed. The Chosen One of God, until The Anointed, the Christ, became the name by which he was designated. Then Andrew brought Peter to Jesus.

The nearer another is to us, the greater our responsibility for him. Our own brothers and sisters know us better than do those outside the family circle; they know our faults and failings, and therefore we shrink from talking to them about our spiritual experiences. It may require courage to do this, but our Christianity is shallow if we cannot do so.

As He looked upon Andrew's brother, Jesus said, "Thou art Simon the son of John; thou shalt be called Cephas." Cephas, the Aramaic name, means "a stone," a detached piece of rock. Jesus knew Peter was too impulsive to be reliable; but he also knew that he would become the rock on which he would one day build His church (Matthew 16:13-19). "In a gallery in Europe there hang side by side Rembrandt's first picture, a simple sketch, imperfect and faulty, and his great masterpiece which all men admire. And so in the two naves, Simon and Peter, we have first a rude fisherman, the man as he was before Jesus began his work on him; and, second, the man as he became after the friendship of Jesus and the teaching of Jesus and the discipline of life had wrought the transformation in him."—J. R. Miller.

Old-Time Athletics

An oldtimer was complaining that the schools devote too much time to athletics nowadays. "Well," someone asked, "what did you old-timers do when you went to school?" "We had fights," replied the old timer.

CHAPTER XIV.—Continued.

Hand stripped to the waist. Connie's eyes rested on the mighty frame of this huge blond; the tumbled and rippling muscles, the great chest covered with a mat of thick hair, and the enormous limbs. Her glance then turned and roved to the man who was to fight for her honor. Donald's eyes were like burning coals. His face had regained its color, but was contorted with a passion that made him seem unhuman. Yet he appeared a mere stripling in comparison to his burly antagonist.

For a moment Connie became a primitive woman. She felt as though she could read and tear. Her eyes darted blue lightnings of wrath toward the man who had insulted her, and her small hands clinched in impotent fury. Her nails cut into her palms as she exercised every ounce of self-control to keep from screaming aloud. Donald was fighting for her. She caught her breath in a quick stab. Her heart was beating with alternate throes of joy and fear. A sudden fit of trembling seized her, and her head felt light and giddy.

Hand's reputation as a rough and tumble fighter was well known throughout the province. It was his proud boast that he never had been whipped. He advanced now, a sinister leer on his face. Andy ran to Donald's side.

"Box 'im, Donnie," he whispered. "Don't let 'im get 'old on you." "You got 'im to vip me? Ah!" scolded Hand in guttural accents.

He came slowly forward with arms spread wide, his thick fingers working convulsively. Donald leaned slightly forward and waited. As he neared him, Hand tore in, sure of himself in the rough and tumble. Donald snatched the man's first rush and shot his left to his face. He was not properly set for the blow, but it stung Hand to madness.

"Ach!" he grunted, "stand and fight you d— coward!"

He came on, his arms swinging wildly. Leaping aside, Donald's heel struck a stump, and before he could regain his footing the giant's arms were around him in a bone-crushing grasp. His hands were clasped at Donald's waist, and the big head was pressed suffocatingly against his throat. Donald was forced slowly backward to strike the ground with a thud, the big man on top.

"Now I got you!" panted Hand as he released his hold on Donald's waist and aimed a blow at his face. With a quick movement the under man turned face down. Hand struck him violently as he lay prostrate under him.

Connie's eyes were wide with horror, and a muffled scream escaped her lips as the blow fell.

With a quick, convulsive movement of his little body Donald thrang Hand from his back and sprang to

his feet. Whirling quickly as the foreigner came toward him, he sent in a volley of blows to his opponent's face. Hand staggered, but did not fall. His lips were cut and bleeding; his nose was broken; and he spat out several broken teeth. Any one of the blows landed was sufficient to send an ordinary man down for the count, but still the gargantuan giant came on.

In and out Donald flashed, his arms moving like steel pistons. Hand could not keep away from the punishing left hand of his lighter opponent. Men not trained in the science of boxing have no punishing power in their left hand, but depend solely on their right. Such was the case with Hand. His style did not vary for a moment. With head low and between his powerful shoulders he would bore in, swinging wildly in the hope of landing a lucky punch, or striving to get a hold on his adversary. Donald's hand kept beating a tattoo on his rock-like jaw, but still Hand came forward, slowly and relentlessly as a steam-roller.

Crowding Donald back to the line of tense spectators, Hand rushed him into the scattering crowd and seized him in a rib-cracking embrace. Donald broke the hold, but not before the brute had hit him over the head with the blow Donald's eyes reeled and the blood gushed from a wide gash on his brow. A blow from the foreigner's big fist then caught him over the heart and sent him staggering to his knees. With a curse the big man came after him. Andy shouted hysterical words of advice.

Donald came slowly to his feet and mechanically side-stepped as Hand came stumbling toward him. Donald evaded him until his head bled, and then he aimed his remaining strength into one mighty blow that landed flush on his opponent's midriff. The blond beast came to his knees with a dull grunt.

"Go after him!" yelled excited voices from the crowd.

Donald stepped forward with fist drawn back to start the kneeling man, but his arm fell to his side and he shook his head. "Get up!" he commanded hoarsely.

Even the strikers gasped their appreciation of this honorable act. A murmur of applause came from both sides. The foreigner shook his head, and then he aimed one more blow to his feet and the sanguinary battle went on. Both men were tired. Donald's breath was coming in short-choking gasps from his tortured lungs, and his face was one mass of blood. Donald's left eye was closed; his lips were split, and the gash over his eye had covered his body with blood. His arms were tired from pounding the iron jaw of his adversary. The big logger's strength was waning; the pounding administered by Donald was beginning to tell. But Donald was too weak to avoid his rushes. In a clinch Hand again butted him with his head.

Blackie, his eyes blazing, leaped forward with a heavy handle in his hand. "You fight fair, d— you, or I'll brain you," he shouted. One of the strikers attempted to wrest the heavy handle from his hands. Blackie felled him with a blow of his fist. It looked for one tense moment as if there would be a general melee. There came sudden snuffing from the crowd of strikers.

It has remained the standard with physicians in the 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting acid cess acids. Each bottle contains full directions—any drugstore.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose and water. It is pleasant, efficient, and

"Back!" John Miller's voice rang out sharp and clear. "I'll kill the first man that interferes!" The eyes shining over the long-barreled Colt held a dangerous glint. The men who had moved to the centre backed away hurriedly.

Back and forth the combatants struggled, neither gaining any decided advantage, each trying to land a blow that would end the battle. Reeling, gasping, striking, falling to their knees from sheer weakness, the men fought on under a burning noonday sun.

No knight of old ever fought more nobly for a fair lady's honour than did Donald McLean that day by the lake-shore. His undershirt was torn to tatters, showing his white skin blotched with welts and bruises. He was losing his sense of distance. Swinging wildly with his left, his wrist struck Hand's adamant jaw. The big man's face went white. He wrote in pain as the arm fell helplessly to his side.

"E's broken 'is 'and," groaned Andy. "Oh, stop it, Andy, please stop it!" sobbed Connie, her arms held out in entreaty.

Donald's face turned a sickly grey and as the well-nigh sightless foreigner staggered weakly toward him, he with a strength born of agony whipped his right to his opponent's sagging jaw. The big man's faltering, sank slowly to his knees and then stretched at full length, his face pressing the soil, quivered and lay still. No sound came from the crowd. The thing had been too stupendous for immediate shouting or applause. Donald stood for an instant swaying uncertainly, then turned to stumble toward his cabin.

Blackie sprang to the top of a stump and swung his hat in the air. "Three cheers for our boss!" he yelled wildly.

A roaring cheer came from the crowd with a right good will.

"Boys, let's go back to work!" shouted Blackie. "We're with you, Blackie!" they answered.

Gillis reached Donald's side as he tottered into the cabin and caught him in his arms as he collapsed into unconsciousness. The big man picked him up tenderly and placed him on the bed.

"Get some 'ot water and towels and telephone for Dr. Paul," commanded Andy tersely.

As Gillis left to fill Andy's commission, Connie fell on her knees by the bedside and wept with wild and passionate violence. "Oh, Donald! Donald!" she sobbed, "you fought for me. I love you! I love you! Oh Andy! turning his streaming eyes to the little man, he won't die! He'll be? Tell me he won't die!" Her trembling fingers were smoothing Donald's dark hair, and she kissed his battered face tenderly, all the while calling his name hysterically.

With tears in his eyes and a heart full of sympathy, little Andy looked down on the recumbent form of his unconscious friend. "It's all right, Connie. 'E'll be all right in a few days," he answered her in a choking voice.

(To Be Continued.)

Recipes for This Week

(By Betty Barclay)

PINEAPPLE JELLY

- 1 tablespoon gelatine.
- 1 cup cold water.
- 1/2 cup boiling water.
- 1/2 cup canned pineapple syrup.
- 3 tablespoons lemon juice.
- 1/2 cup sugar.
- 3 tablespoons pineapple cubes.
- 3 tablespoons Macintosh cherries.
- 2 tablespoons cut walnut meats.
- 3 tablespoons cubes of orange.

Soak gelatine in cold water; dissolve in boiling water, and add pineapple syrup, lemon juice, and sugar. When gelatine is beginning to get stiff, stir in the fruit and nuts, of which there should be, in all, three-fourths of a cup. Turn into a mold, and chill.

MOCK DUCK (Norwegian)

- 2 pork tenderloins.
- 2 tablespoons butter.
- 1 cup sweet cream or very rich milk.
- 5 boiled prunes.
- 1 cup thick sour cream.
- 2 apples.
- Salt and pepper.

Cut tenderloins half through lengthwise. Open and pound flat. Cut apples in thin slices, cover the tenderloin. Remove stones from prunes and cut over apples, add seasonings and cover all with second tenderloin roll and the securely. Brown in butter. Pour on a little broth, the sweet and sour cream, and cook slowly for one hour.

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published by The Saskatchewan Dental Society

GINGIVITIS

Meaning what? It is a suffix, implying inflammation and gingivitis—the soft tissue immediately encircling the tooth.

This, then, is an inflammatory condition of the gum tissue, adjoining the teeth.

Consider your mirror: Notice how snugly these tissues hug the tooth surfaces in health, filling the interstices and guarding the supporting structures from injury and disease. Now you will have observed that the gingivae are not attached to the tooth surfaces for a short distance down and hence, are "free"; also, that their color in health is a lustrous pink.

But the inflammation appearing, you have a rush of blood within—and soreness develops, so that you readily perceive that they are far from the state of health.

Now what may cause this? It may be that some body disturbance is accountable. General ill-health, diseases of organs or glands concerned in body welfare such as diabetes, or run down nervous system may cause this.

Among the more positive causes, filth and tartar no doubt play a part; of the unclean food between teeth with faulty contacts, and disease-producing organisms are all held responsible.

If, for any reason, there is a slight opening between two teeth, food which is tough and stringy will be crowded into the space and cause pressure upon the underlying tissue. A single such occurrence may do but little harm, but if it is repeated, it is promptly removed, but where there is this repeated pressure and irritation, the tissue is inflamed much of the time. Similarly the crowding of "tartar" upon these tissues or removal of the tartar from whatever source will set up this process.

It is in these gingivitis cases, then, that the initial injury may occur, which, if neglected, frequently leads to the infective process known as pyorrhea. So that any inflammatory condition or tenderness of the gum should receive early recognition, and have prompt remedial treatment at the hands of your dentist.

Has Increased Crop Area

In Manitoba there is one tractor for every 4.6 farms; in Saskatchewan one for every 4.7 farms and in Alberta one for every 7.5 farms. The mechanical equipment has been a material factor in the large increase in area under field crops in the prairie provinces, which has increased from 3,600,119 in 1900 to 5,683,268 acres in 1928. Practically 2,000,000 of this increase has taken place since 1920.

Magistrate (dealing with New Year's Eve episode): "Who was driving when you collided with the other car?"

Merry Motorist (triumphantly): "None of us; we were all in the back seat."

In the Law Courts, London, there are 1,100 rooms, a printing press and a blacksmith shop.

To believe with certainty, one must begin by doubting.—Stanislaus.

Bracing Breakfast for Bitter Weather

Serve with piping hot milk - Doesn't overload your stomach - Makes you alert and active - Fine for youngsters

Made by The Canadian Shredded Wheat Company, Ltd.

Belongs To Middle Class

Sun Is Ordinary Star In Scale Of Brilliance Says Astronomer

The sun is a very humble unit amid the great stellar population according to A. S. Eddington, the astronomer. It is, he says, a very ordinary star about midway in the scale of brilliance. We know of stars which give at least 10,000 times the light of the sun; we know also of stars which give 1-10,000 of its light. But those of inferior light greatly outnumber those of superior light.

In mass, in surface temperature, in bulk, the sun belongs to a very common class of stars; its speed of motion is near the average; it shows none of the more conspicuous phenomena such as variability which excite the attention of astronomers. In the community of stars the sun corresponds to a respectable middle class citizen.

It happens to be quite near the centre of the local star cloud; but this apparently favored position is discounted by the fact that the star cloud itself is placed very eccentrically in relation to the galactic system (the Milky Way), being in fact near the confines of it. We cannot claim to be at the hub of the universe.

Little Helps For This Week

"Strengthened with all might, according to His glorious power, unto all patience and long-suffering with joyfulness."—Colossians 1. 11.

I longed to gird the harness on To work with might and will; Stern was the voice that said to me

My child, wait and be still. He only knoweth how to serve. Who knoweth how to wait; Thus I will all who wish to work Within my vineyard gate.

—Mary Frances Butts.

Working or waiting, our souls will hang on Him. And waiting, as we must recognize and remember, is a sacrifice of self, a real martyrdom no less than working. To win the soul in patience, to bear the trial of delay, to watch for the dawn through the chill hours which precede it, to keep fresh and untroubled the great hope that Christ will come, is a witness to the powers of the unseen world, which the Spirit of God alone can make possible.

—Brooke Foss Westcott.

No country can approach Canada in the use of the 'plane in protective forest control.

Simple Precautions Against FLU

Sore Throat —

The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—the chest is affected. A safe plan is to gargle the throat three times daily with "Nervine"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nervine—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease-breeding wastes.

This combination treatment of Nervine and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE is a real boon, enabling the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, as well as attaining the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in sheets any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness weighs about 125 to 130 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

The Journal

Personal and Local

The houses owned by J. Michal sky on the Blairmore road are being moved to East Coleman.

J. S. D'Appolonia recently returned from a very interesting trip to Prince Rupert, Vancouver and Victoria, the occasion being the annual convention of the Western Lumbermen's Association.

Messieurs T. Bowen, I. Nielsen and F. Cox attended the annual assembly of the Rebekah Grand Lodge as delegates from Coleman. The meeting was held in Calgary.

H. T. Halliwell attended a meeting of the executive committee of Alberta division of the Canadian Weekly Newspapers Association held last week in Calgary.

"Abie's Irish Rose" was thoroughly enjoyed at the Palace last week-end. It showed that Jew and Gentile Protestant and Catholic, are all aiming for the same place in the hereafter, yet each is taking his own route. It exemplified the quotation that "Just one touch of Nature makes the whole world kin."

The funeral was held on Sunday of J. Volf, miner, who died after from injuries received in McGillivray mine. He leaves a mother and two sisters in Jugoslavina and was 35 years of age. He came to Coleman from Drumheller in August. The local unions were represented by W. Haysom, D. Gillespie and a number of members. The service was held at St. Alban's church, the Rev. A. D. Currie officiating; and burial in Coleman cemetery.

The return of milder weather comes as a welcome relief after the severe spell of several weeks' duration. On Monday morning the temperature took a sharp drop, registering 32 below zero, but it has since warmed up and milder weather is forecast. The bright sunshine of Wednesday and to day has started to thaw the snow, and the lengthening of the days gives people the feeling that spring is on the way.

Recital and Dance on Monday

You are invited to a Recital in the K. of P. hall by the pupils and singing class of Mrs. Salt, on Monday, Feb. 25, at 7.30 p. m., to be followed by a dance from 10 p. m. till 1 o'clock. Refreshments will be served. Admission to recital and dance 50c. A 4 piece orchestra in attendance.

School Trustees Convention

It is interesting to note the reaction that is looming up to the attitude of the majority at the trustees convention recently held in Lethbridge. The same element who were not stampeded apparently did not have an opportunity to express their opinions at the convention, and even if they had they would have likely been howled down as was the Minister of Education. From letters appearing in The Lethbridge Herald and newspaper comment in other dailies, there is a very large section of public opinion apart from the school trustees who are desirous of more consideration being given to the Hon. Perren Baker's proposals. The mere fact that his proposals involving study of the school system covering months or even years were summarily disposed of by a convention of school trustees, many of whom probably had not even taken the time to read the booklet sent out by Mr. Baker, makes one question the use of submitting topics of such importance to a convention which is likely to be governed by mob psychology instead of calm consideration and mature judgment.
